

profile, decide, record

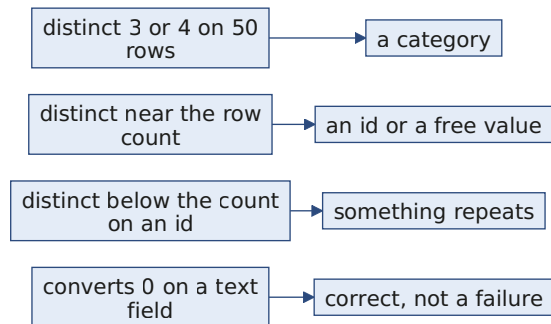

Week 1, Day 3. Print landscape. Six panels, pictures only. The text sheet beside this one carries the words.

1 three counts per field

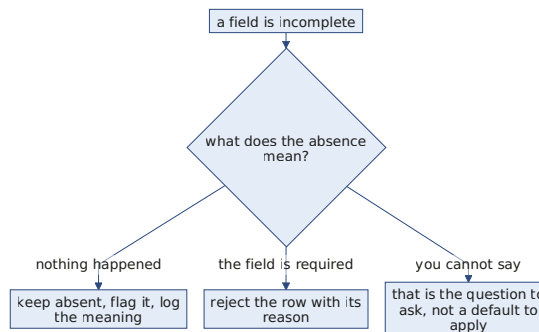

Crux. distinct is the only count that can fall, so it is the only count that can warn you.

2 reading a profile as a shape

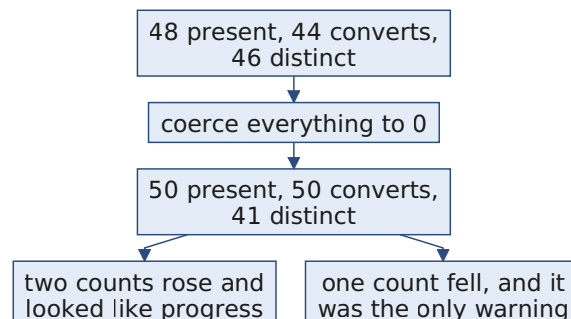

Crux. you know where the work is before you have touched anything.

3 missing is a three-way decision

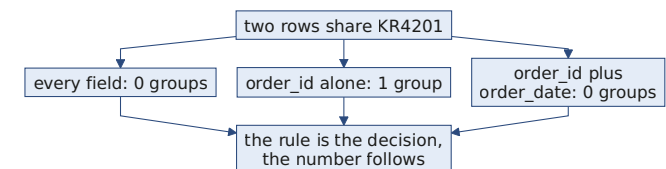

Crux. a default you did not state is data you invented.

4 the coercion trap

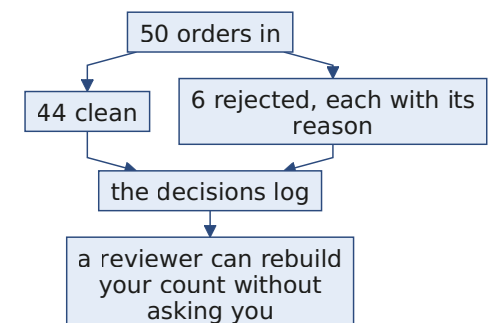

Crux. a pass that never fails is a pass that destroyed the evidence.

5 an identity rule is something you state

Crux. the data cannot tell you what the same record means, so somebody has to.

6 what ships

Crux. what ships is the data plus every decision taken on it.
