

errors and files

Same eight panels with a quarter of the cells blanked. Fill it from memory first, then check against the full sheet. Filling it in twice a week is worth more than reading it ten times.

1 read a traceback

Read from the _____ up.

Line	Question it answers
Last	_____
Naming your file	Where you edit
Above that	How you got here
Three questions every time: exception type, my line, and _____.	
Crux. _____.	

2 return against print

```
def f(r): print(r["order_id"]) # hands back _____
def g(r): return r["order_id"] # hands back _____
```

print is for _____. return is for _____.

Crux. if the caller needs the answer, the function _____.

3 catch narrowly

```
try:
    value = int(raw)
except _____ as e:
    rejects.append({"id": rid, "reason": _____})
```

Catch	What it survives	What it hides
except ValueError	The failure you predicted	Nothing
except:	_____	_____

Crux. a crash costs _____, a plausible wrong number costs _____.

4 the reconciliation

```
assert len(clean) + len(_____) == len(_____)
```

Crux. input equals _____, or something disappeared.

5 the four errors of Day 2

Error	It means
TypeError: 'NoneType' object is not subscriptable	_____
ValueError: invalid literal for int() ...	A word arrived where a number belonged
FileNotFoundError: [Errno 2] ...	_____
JSONDecodeError: ... line N column M	The parser ran out of valid input there

Crux. every one of these names _____.

6 opening files

```
with open(path) as f:
```

The _____ is guaranteed, including when your code _____ inside the block.

Paths are relative to _____.

Crux. FileNotFoundError prints _____.

7 CSV and JSON

	CSV	JSON
Agrees about	_____	Types and nesting
Types	Everything is _____	Numbers stay numbers
Nesting	_____	Native
Partial read	Possible	_____

csv.DictReader keys come from _____.

Crux. everything a CSV agrees to is _____, so conversion is _____.

8 one pass, two files

```
_____ what converted
_____ what did not, and why
```

Crux. writing a file is not finishing. _____ is finishing.

THE WORDS ON THIS SHEET

Function One decision, named, with one home, callable again	return against print print shows a person, return hands a value to the next line	Traceback The stack of calls that led to a failure, read from the bottom	raise Refusing on purpose, with your own wording and the offending value	Reconciliation Input equals clean plus rejected, asserted every run
		Named exception Catching the failure you expected and nothing else	Rejects log One row per record you could not use, each with its reason	File format An agreement about structure, and nothing more than it states
